

NEURALEDGE

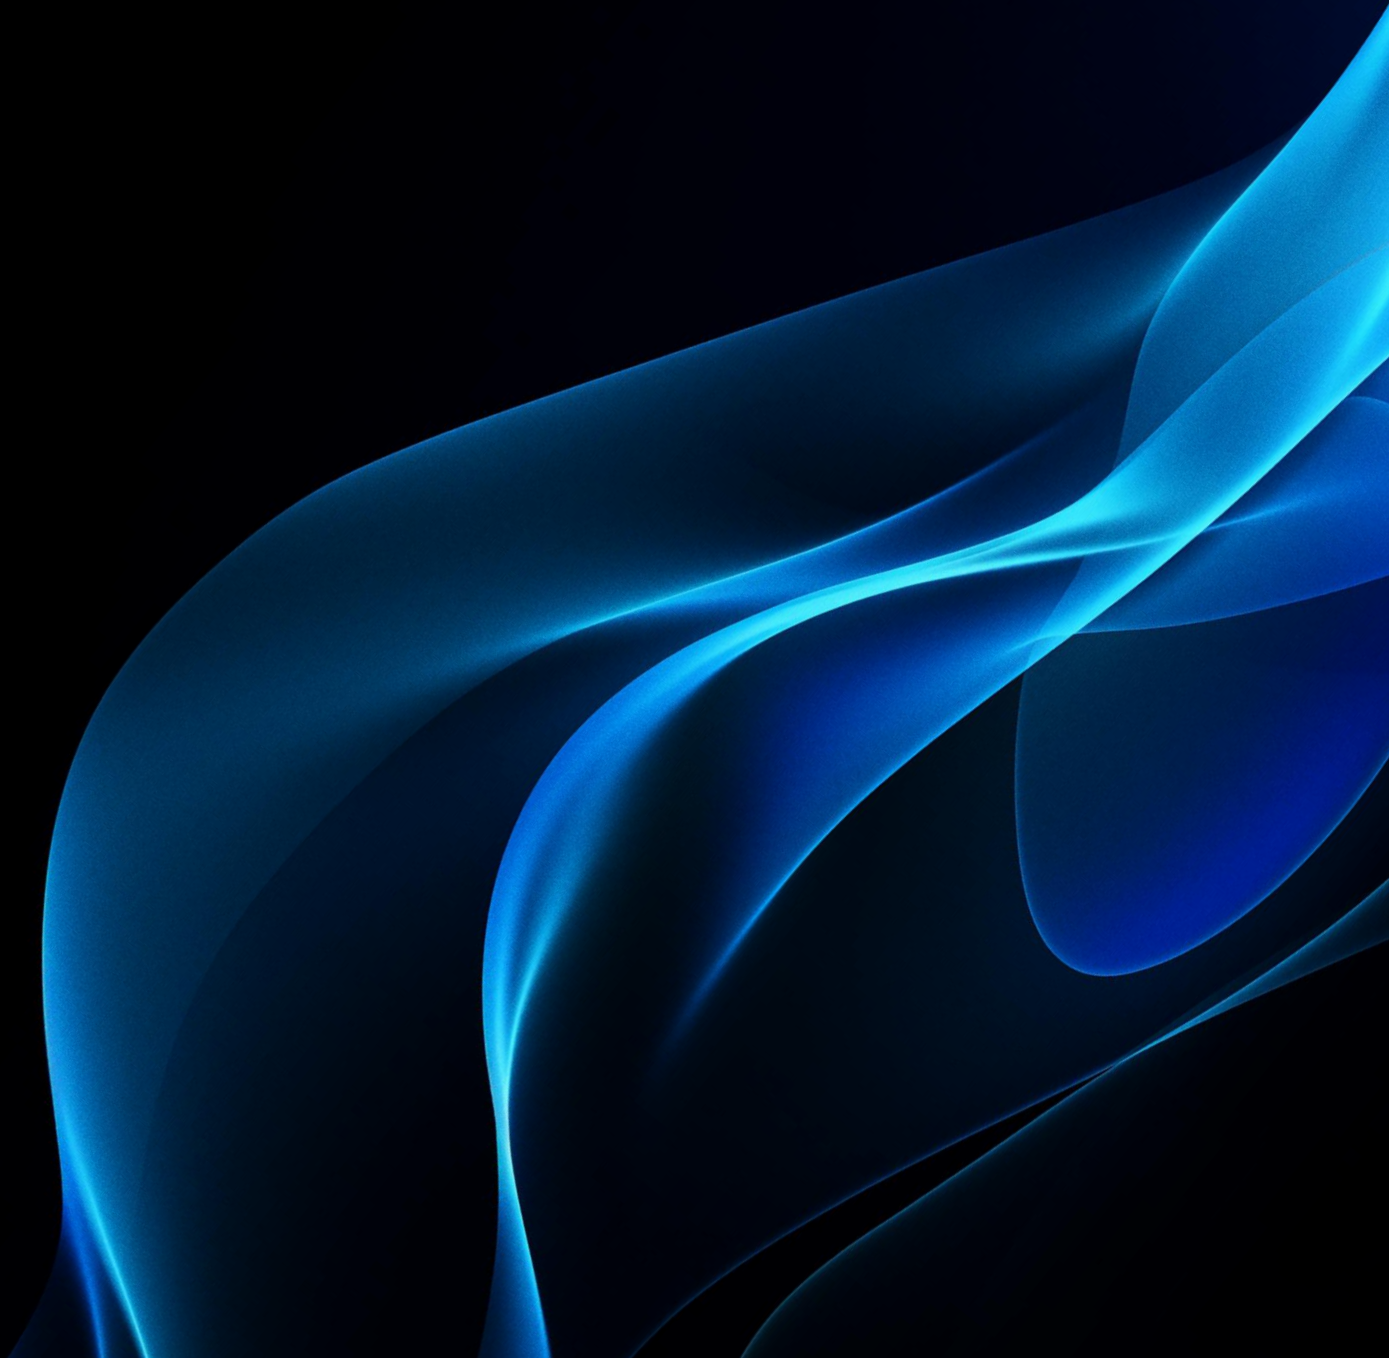

The World's First

Sovereign MMO Exchange Commodity Engine

NEURALEDGE

The World's First
**Sovereign MMO
Exchange
Commodity Engine**

The Trillion-Dollar Fracture.

The infrastructure of the past cannot support the future of digital commerce.

The Untapped \$16T Bedrock

A projected \$16 Trillion in Real-World Assets will be tokenized by 2030, yet digital economies are disconnected from this stability.

Unsustainable Speculation

"Play-to-Earn" models are built on hype, with tokens crashing over 95% from their peaks.

A \$5 Trillion Market Need

The Metaverse, a projected \$5 Trillion market by 2030, requires a unified, sovereign infrastructure.

The First Sovereign Digital Nation

We are engineering a self-sustaining economy, unifying gaming, finance, and Real-World Assets into one immersive realm.

The Four Pillars of the NeuralEdge Economy

The Eterum Veil

An immersive MMO where entertainment drives economic velocity.

Tokenization Engine

A closed-loop currency system built on utility, not speculation.

RWA Integration

Anchoring the economy with tangible assets like land and energy resources.

Sovereign Infrastructure

Independent vaults and systems, free from legacy constraints.

The Eterum Veil

A New Digital Marketplace.

More than an MMO, it's a fully functional business ecosystem designed for tangible value exchange.

01

Virtual Headquarters

Corporations establish immersive shops and remote workspaces, connecting directly with customers.

02

Trustworthy Transactions

Our verified systems allow digital purchases for physical goods, with secure real-world delivery.

03

Player-Built Economies

Entrepreneurs (players) actively create and trade goods and services, fueling a dynamic internal market.

Revenue Driven by Velocity, Not Speculation.

NeuralEdge profits as the digital nation's host, landlord, and venue, capturing value from every interaction.

The Vault of Echoes (Treasury)

All economic activity; fees, commissions, taxes flows directly into this central treasury.

The Perpetual Fee Engine (70/30 Split)

70%

Recirculated

Reinvested into the ecosystem (players, quests, expansions) to fuel growth and engagement.

30%

Company Profit

Sustainable revenue for NeuralEdge and its investors.

Diversified Inflows

Powering the Perpetual Fee Engine.

Our revenue is generated from every layer of economic activity within the Eterum Veil.

Marketplace Commissions (5%):

Fees on all player trades and third-party vendor storefront sales.

Property & Stall Rentals:

Leasing virtual land and commercial spaces to players and businesses.

PvP Tithes (10%):

A portion of currency lost on player-versus-player death, recirculated for ecosystem health.

Black Market Premiums

Deliberate, high-value coin sinks for exclusive items or services.

NFT Collectibles

Sales of unique digital assets, including those redeemable for physical metals (Celestial Gold).

Entertainment & Event Fees

Charges for access to premium in-game experiences, tournaments, and exclusive events.

ETTY The Hard-Capped World Currency.

Eterums (ETTY) powers the NeuralEdge economy. Its value comes from true scarcity and constant use, not market hype.

Fixed Supply

40,000,000

This hard cap makes it mathematically scarcer than Bitcoin.

Active Circulation

17,000,000

ETTY actively flowing in the play economy, driving daily transactions.

Player-as-Wallet (The Veilmark)

Each avatar is your secure digital wallet. You carry your wealth, making every action meaningful.

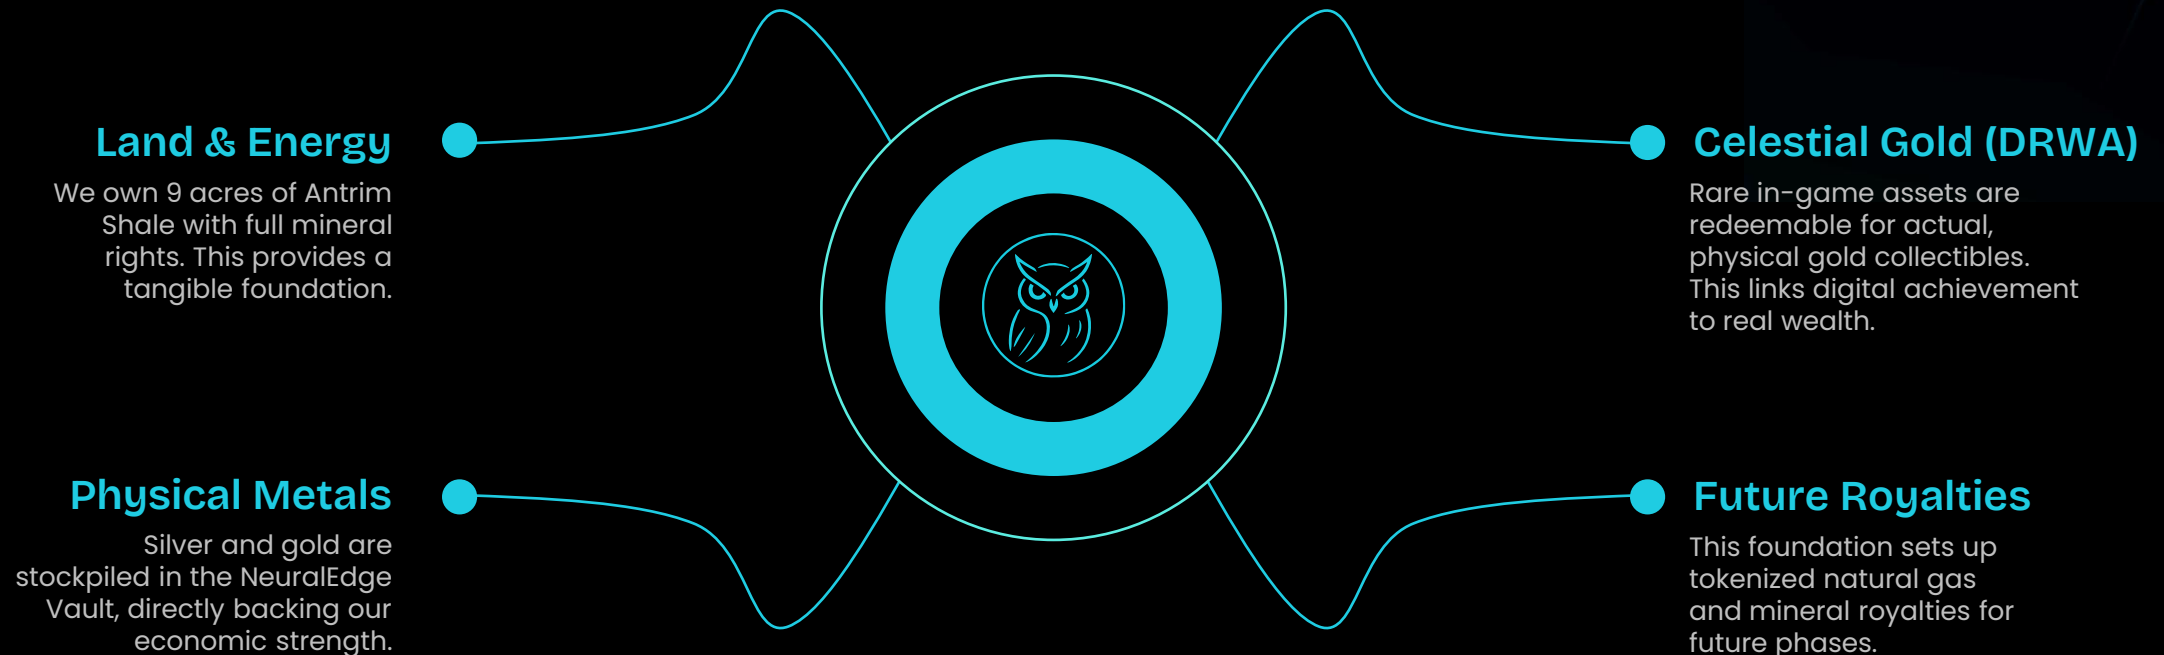

Essential Utility

ETTY is vital for marketplace trades, banking, governance, and powerful in-game advantages.

Backstopped by Real-World Assets.

NeuralEdge is more than a game. It is a sovereign engine, secured by hard collateral in the physical world.

Built. Validated Poised For Launch

The core of NeuralEdge is operational. We seek capital to scale, not to build from scratch.

Foundation Built

01

Core lore, economic model, and infrastructure are complete.

Execution Proven

02

Marketplace is ready and key talent secured with capital efficiency.

Industry Validated

03

Invitation to CES 2026 confirms global recognition and partner interest

Ready to Scale

04

We are now poised to launch, ignite sales, and grow our community.

Your Investment

9 Months, Massive Returns.

This \$2.75M pre-seed round offers rapid valuation growth and a clear path to your next win.

Core Traction

25K+DAU & \$500K+ Monthly GMV

Real-World Security

Acquire 9-acre Antrim Shale Asset

Global Spotlight

Showcase at CES 2026

Series A Ready

Set up for a lucrative follow-on round

Valuation Leap

\$12M

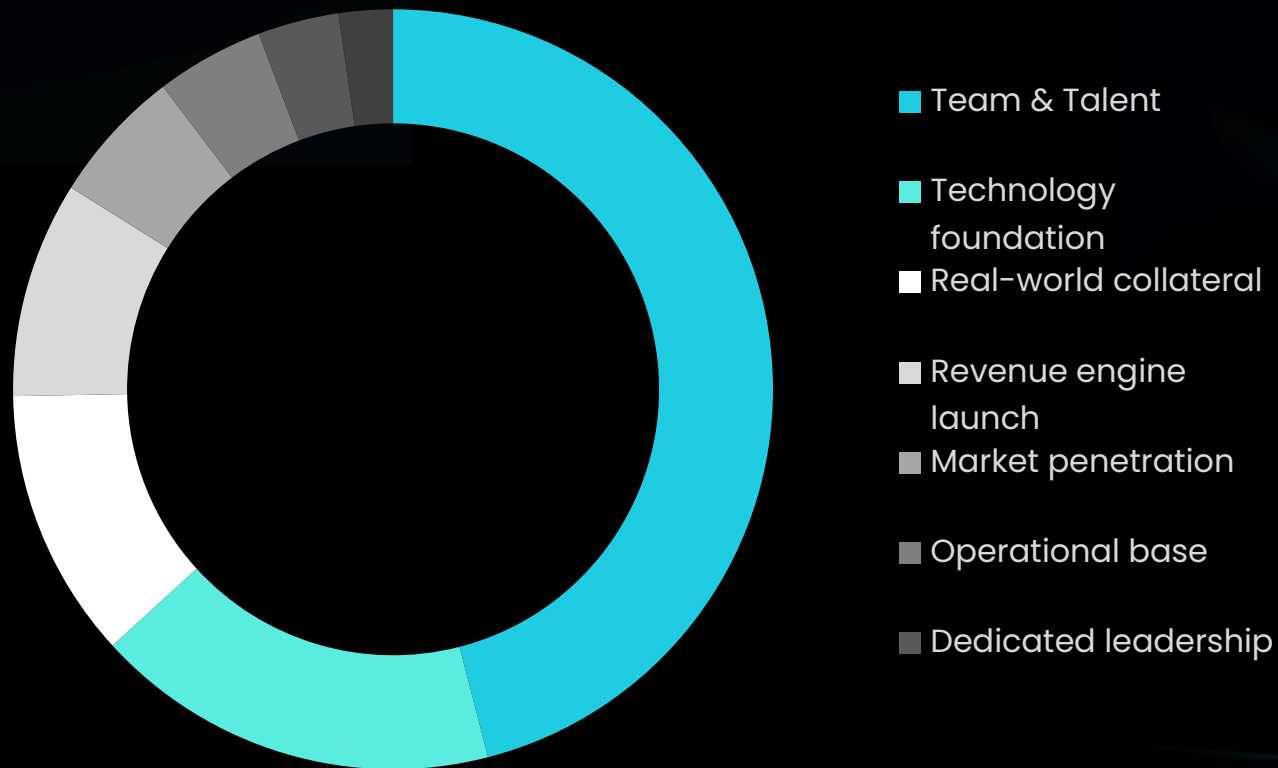

Pre-Seed

\$30-40M+
In 9 Months

\$2.75m For Phase 1 Strategic Allocation

Every dollar fuels critical launch milestones and builds the foundation for our sovereign economy.

NEURALEDGE

The End Of Speculation. The Beginning Of Value.

For too long, the digital world has been built on hype. We are building on something real: land, energy, and a working economy. This is the inevitable future of digital life.
